

Lifetime License Holders: Time to Request Seasonal Information

The NC Wildlife Resources Commission is reminding lifetime license holders that it is time to request a copy of the 2012-13 NC Inland Fishing, Hunting and Trapping Regulations Digest for the upcoming season, which begins Aug. 1. Lifetime license holders who are licensed to hunt big game and migratory game birds also can request their big game harvest report cards and HIP certification at the same time. Make requests by:

- Going to www.ncwildlife.org and clicking on the lifetime license holder seasonal information button;
- Calling the Commission at 888-248-6834. Hours of

operation are 8 a.m.-5 p.m., Monday-Friday;

- Visiting a Wildlife Service Agent. Most agents are located in bait-and-tackle shops, hunting and sporting goods stores and larger chain stores across the state.

The 2012-13 N.C. Inland Fishing, Hunting and Trapping Regulations Digest will be available at agent locations, and on the Commission's website, on Aug. 1.

For more information on inland fishing, hunting and trapping, visit www.ncwildlife.org.

Pollinator Habitats in Continuous Conservation Reserve Program

Anson County USDA Farm Service Agency (FSA) Executive Director Acting CED Amy Yaklin, announced that pollinator habitats, which support a variety of pollinator species, will now be accepted as a Continuous Sign-up Conservation Reserve Program (CCRP) practice. CCRP is a voluntary program that helps producers apply conservation practices to safeguard environmentally sensitive land.

Pollinator habitats are areas of permanent vegetation located in an agricultural landscape: field edges, field middles, odd corners, or any agricultural location that is suitable for establishing pollinator habitat.

Pollinators provide a very important ecological service. Approximately three quarters of all flowering plants rely upon external assistance to pollinate their flowers. In addition to agricultural crops such as fruits and many vegetables, these plants include seed producing wildflowers, fruit producing shrubs and nut producing trees which provide a source of food for many wildlife species. Studies indicate that birds, bees, bats, and other pollinators are in significant decline across the country and around the world. Nearly 80% of the crops grown in the world require pollination. In the United States, insects pollinate crops that producer \$40 billion worth of products annually.

Participants of newly enrolled pollinator habitat practices are eligible to receive a \$150 CRP Signing Incentive Payment (SIP) per acre. The SIP is a one-time payment issued to CRP participants after the contract is approved. The following practices qualify for the \$150 SIP:

- Pollinator Habitats (for continuous sign-up only);
- Wetland Restoration & Wetland Restoration (non-floodplain) practice which restores the functions and values of wetland ecosystems that have been devoted to agricultural use and;
- Habitat Buffers for Upland Birds practice which provides food and cover for quail and upland birds in cropland areas

The SIP for all other continuous sign-up practices remains at \$100 per acre.

Continuous CRP sign-up allows participants to submit offers for selected CCRP practices to enroll in CRP at anytime instead of waiting for a General CRP sign-up period. Participants and offered lands must meet certain eligibility requirements to be accepted into the program.

For information contact the Anson County FSA office at 704-694-3516, extension 2 or visit www.fsa.usda.gov.
