

## Youth Deer Hunting Day Scheduled for Saturday

The N.C. Wildlife Resources Commission has set this Saturday, Sept. 23, as a Youth Deer Hunting Day. On this day, youth 17 and younger may use any legal weapon to hunt deer of either sex and are not required to be accompanied by an adult if they have completed a hunter education course. The Youth Deer Hunting Day provisions apply to both private and public lands.

Hunters age 18 and older with a valid hunting license may use only the weapon that is legal for the type of season in their county on this day. All hunters must wear blaze orange on Sept. 23, even if the hunter is using archery equipment. The use of dogs for deer hunting is allowed during Youth Hunting Day in areas where it is lawful. During the remainder of hunting seasons, youth 17 and younger are required to use the legal weapon for the open season in the area where they are hunting.

Youth Deer Hunting Day, which coincides with National Hunting and Fishing Day, was established in 2015 to increase interest in deer hunting among youth, potentially increase their success at hunting, and highlight the need to engage youth in hunting. Hunters can try their big game harvests either by phone at 800-I-GOT-ONE (800-446-8663), online at "Report a Harvest" ([www.ncwildlife.org/igotone](http://www.ncwildlife.org/igotone)) or at a participating Wildlife Service Agent location. The Commission no longer offers big game harvest reporting through Wildlife Cooperator Agents using paper record sheets.

Fred Kristensen had a passion for flying planes until he began having difficulty breathing. He was diagnosed with Chronic Obstructive Pulmonary Disease (COPD) and was put on oxygen. Fred was told that his only long-term hope was to receive a lung transplant. Before being eligible for a lung transplant, he was referred to McLeod Health Cheraw for pulmonary rehabilitation to improve his lung function and condition him for the transplant. Under the skilled care of Sonny Usher, Director of McLeod Pulmonary Rehabilitation in Cheraw, a customized exercise and training program was designed to help Fred achieve the best results. "Because of Sonny and the McLeod team, I was properly conditioned and ready to receive my new lung," says Fred. After a successful lung transplant, Fred continues maintenance rehabilitation with McLeod and is able to breathe easy while in his pilot seat.
