Memory Screening at Grace Senior Center

Did you know that November is National Alzheimer's Disease Awareness Month? The Alzheimer's Foundation of America initiated National Memory Screening Day as part of its mission to provide "optimal care and services to individuals confronting dementia, and to their caregivers and families"... and as part of its focus on "Caring for the nation." Who Should be Screened? Memory screenings make sense for anyone concerned about memory loss or experiencing warning signs of dementia; whose family and friends have noticed changes in them; or who believe they are at risk due to family history of Alzheimer's disease or a related illness. Screenings also are appropriate for anyone who does not have a concern right now, but who wants to see how their memory is now and for future comparisons. These questions might help you decide if you should be screened. If you answer "yes" to any of them, you might benefit from a memory screening.

- Am I becoming more forgetful?
 - Do I have trouble concentrating?
 - Do I have difficulty performing familiar tasks?
 - Do I have trouble recalling words or names in conversation?
 - Do I sometimes forget where I am or where I am going?
 - Have family or friends told me that I am repeating questions or saying the same thing over and over again?
 - Am I misplacing things more often?
 - Have I become lost when walking or driving?
 - Have my family or friends noticed changes in my mood, behavior, personality, or desire to do things?
- Note: A memory screening is not used to diagnose any particular illness and does not replace consultation with a qualified physician or other healthcare professional. Grace Senior Center will be participating for the 2nd year in the National Memory Screening Day on Tuesday, November 13, from 11 a.m. to 3 p.m. at Grace Senior Center. Call and register at 704-694-6616.
