

New Program at Anson Middle School Called Project Lead The Way, Design and Modeling

Project Lead The Way (PLTW), Design and Modeling is a program new to Anson Middle School. Students from grades 6 to 8 have a new opportunity to develop their creativity, problem solving skills and teamwork throughout this pre-engineering course.

The goal of PLTW is to present students with a real-world issue, such as disabilities, and allow the students to develop a solution using sketching techniques, technology and hands-on building. Along the way students learn how to channel their creativity in a positive way, bringing their ideas to life.

The photographs shown here are the first two weeks of PLTW, Design and Modeling as students work together on their projects to understand the design process and what it means to be an engineer.

AMS Students Getting a Solid Education in the Sciences

Anson Middle School is off to a great start this school year! Science classes at the school are in full swing, with students diving right into the Chemistry and Periodic Table Unit! Some of the students are pictured below.

So far this year students have participated in numerous STEM lab activities, and have really enjoying applying specific knowledge to real world problems!

Banner Program Brings Beauty to Uptown Wadesboro

Have you seen the new fall banners in uptown Wadesboro yet? As part of Anson County Tourism Development Authority's commitment to promote tourism and encourage economic development, the organization has developed a street banner program to enhance its streetscapes and promote the community.

The program is part of a countywide wayfinding and branding project. Banners in the heart of Wadesboro which are seasonal for spring, summer, fall, Christmas and winter will be rotated five times per year by the town of Wadesboro. These banners are funded by local businesses or individuals as part of a public-private partnership effort for tourism and economic development in the county. The themes and designs are the responsibility of the TDA board.

For more information contact the tourism board's chairman Lewis Evans at 704-695-4238.
