**Energy Efficiency Tip of the Month**

**Energy Efficiency Tip of the Month**

The holiday season is upon us, and that means we'll be using more energy in the kitchen! When possible, cook with smaller countertop appliances instead of the stovetop or oven. Smaller appliances like slow cookers, air fryers and Instant Pots consume less energy.

When using the oven or stovetop, match the size of the pot to the heating element and place a lid over the pot while cooking. The food will cook faster, and you'll use less energy.
