### Career Focus at Anson High School

Exciting career guests and activities deliver valuable information to Anson High School freshmen

The Career Management (Career and Technical Education - CTE) class focuses on foundational skills with a twist for enrolled students. Anson High School offers ten career clusters, and students spend approximately 5-6 instructional hours focusing on each of them as it correlates with the curriculum. Additionally, supplemental activities and speakers offer a diverse perspective to the various careers.

The goal is for students to select a career cluster they would like to follow during their tenure at Anson High. This goal will become their Major and they will also select a Minor which may include Arts and JROTC. Lastly, with the partnership of SPCC offering community college classes on campus and achievement of various industry recognized certifications, students will be better prepared for the workforce and higher education. These students will have an opportunity to interact and network with career professionals at a Career Fair on December 8, from 12 to 2 p.m.

If there are any businesses that would like to participate

# 1 clinical trial can make all the difference.

# We have 250.

Lung cancer tried to take Angee down. But the right clinical trial was just the breakthrough she needed to keep fighting.

When you're facing advanced cancer, having access to more clinical trials means a better chance of finding the treatment that could change everything for you.

At Levine Cancer Institute, we offer you more clinical trials and a wider range of treatment options than any other cancer center in the region. That means more opportunities to find a cure – and more hope for a future that's cancer-free.
